*Turn iron, smelly water into clear  
and tasty drinking water today!*

## The **IRONSHIELD++**

*air injected system, will successfully remove all of your iron and Sulfur from your water before it gets to your faucet.*

Improve water's taste

Make white clothes white

No more expensive and messy chemicals

No pumps to fail

No maintenance or filter to replace

# *Let us help you treat, fix and LOVE your WATER!*

An iron problem is characterized by the red-brown staining of bathroom fixtures and laundry. The water is clear when drawn but once exposed to air the iron changes into a ferric (oxidized) state. Iron filters work by oxidizing the iron and/or sulfur and then filtering it out through the media bed.

Our IRONSHIELD++ regenerates the media with an all natural process that uses FREE Oxygen. Successfully remove radium, uranium, selenium, arsenic, zinc, copper and lead, as well as other radionuclides. This filter uses oxygen to oxidize the stored iron residue and washes it down the drain during the regeneration process that automatically occurs every three days while you're sleeping.

---

*Save money and remove  
all unwanted toxins with  
NO salt or chemicals.*

LOVE YOUR WATER
